To Whom It May Concern:

Bast Hatfield, Inc. was the General Contractor holding all contracts for construction on the Woodstock, NY Main Post Office, where ARCADD, Inc. was the Architect and Designer of record. We found working with ARCADD on this project to be a very positive experience.

Rather than design the normal utilitarian government issue post office, ARCADD designed a beautiful, useful structure reminiscent of a Victorian style train station, that dovetails nicely with Woodstock's quaint architecture. Although the structure looks like it was from the 1890's on the outside it seamlessly incorporates the United States Postal Service's latest amenities and surveillance systems.

ARCADD's staff was very professional and pleasant to work with. Their attention to detail, willingness to share their overall design concept and ability to quickly resolve any problems that arose made the project flow smoothly. Their plans and specifications were concise and did not leave us guessing as to what needed to be done.

If the opportunity presents itself, we would gladly work on an ARCADD project again.

Very truly yours,
BAST HATFIELD, INC.
